AI Prompts Used - RouteWise Compass Enhancement

1. Help me change TripWise from a drive-vs-fly calculator into drive, fly, train, bus, bike, and mixed travel.
2. Help me redesign the website so it looks more professional, useful, and easy for travelers to understand.
3. Help me decide what user inputs are needed, including origin, destination, budget, days available, travelers, luggage, lodging, bike experience, comfort, safety, and flexibility.
4. Help me build decision logic that recommends the best travel option based on cost, time, safety, comfort, flexibility, budget fit, and feasibility.
5. Help me add useful planning features, including a USA map route preview, itinerary, stops, stays, nearby attractions, packing checklist, safety checklist, and backup plan.
6. Help me create the enhancement document and color-coded flowcharts showing what was retained, what was newly added, and what decision logic was modified.
